## Skills

Java, J2EE, Java 8, Java 17, Java 21

Spring Boot, Spring 3, Spring framework

Spring Data JPA, Hibernate

Spring Cloud, GCP, Apache Openshift, AWS

Microservice

Rest Web Services(API), REST

MySQL, Oracle, Couchbase, Mongo DB

Gitlab, GitHub, Bitbucket, Git

JavaScript, HTML, CSS, Bootstrap, Thymeleaf

## Profile

Results-driven Lead Software Engineer with 8+ years of experience in designing and delivering high-performance, scalable solutions for global clients. Specializes in developing microservices using Java and Spring, with deep expertise in cloud-native architecture for building resilient, fault-tolerant systems. Proven track record in implementing robust CI/CD pipelines to streamline deployments and enhance code quality. Adept at leading cross-functional teams to execute complex projects within tight deadlines, while promoting a culture of mentorship and engineering excellence. Well-versed in RESTful API development and database management, poised to contribute as a Lead Assistant Manager by driving innovation and technical leadership.

## Employment History

### Lead Assistant Manager, EXL Services UK Pvt. LTD.

Aug 2025 – Present    Northampton

#### GFED - USCB Cards:

As a leading bank in the UK & US region Barclays leverages its partners to issue credit cards to their customers on their behalf after making a proper credit verification and check. RFT plays a role in deciding the credit to be issued to an applicant, based on several bureau data and fraud activities pulled from internal and external services and applying specific strategies for each partner.

Client: **Barclays USA**

Team Size - 4

#### Responsibilities:

- Led requirements analysis and architecture for Experian cloud migration, aligning USCB APIs to streamline the customer application journey and data flows.
- Refactored microservices to support the new SSDD bureau data structure and defined new decisioning flows to satisfy updated business requirements.
- Developed new microservices to enable USCB APIs to complete end-to-end customer decisioning independent of upstream and downstream dependencies.
- Migrated legacy CI/CD from Stash & Jenkins to GitLab CI/CD, improving deployment speed and environment flexibility by 60%.
- Acted as API team lead across agile ceremonies — finalizing requirements, conducting code reviews and delivering stakeholder demos — while mentoring engineers.

### Lead Assistant Manager, EXL Services

Jul 2024 – Jul 2025    Remote

Client: **Barclays USA** — Team size: 8

- Captured requirements and aligned technical solutions with stakeholders.
- Mentored engineers and removed blockers to accelerate delivery.

Apache Kafka, Rabbit MQ

Docker, Swagger, OAS

Jenkins, CI/CD, Gitlab Duo

Agile (Scrum)

Junit, Mockito Framework,  
Mutation Testing

ELK, App Dynamics, EsaaS,  
Splunk, Grafana

DSA

## Languages

English

- Designed scalable microservices, resolved production issues, and ran POCs to adopt new technologies.

### Senior Software Engineer, EXL Services

Jun 2022 – Jun 2024    Remote

Client: **Barclays USA**

Team Size - 4

#### Responsibilities:

- Developed APIs through a set of microservices using the Spring framework, allowing data integration with external systems, such as Experian and internal systems to complete an application journey with smooth transition and in minimal time possible
- Migrated the application architecture to the Openshift V4 template to be a highly available, fault-tolerant, auto-scalable application using modern cloud technologies and features to be robust, resilient, and available round the clock. Integration to OAuth was also introduced with the transition to a new template
- Created a system to manage application logs using ELK and monitor system health using the App Dynamics dashboard
- Led a team of software engineers to develop and deploy a complex application in a short time frame
- Implemented a Continuous Integration/Continuous Deployment (CI/CD) pipeline that shortened the time for cross-environment promotion and decreased the time to deployment from 4 hours to 15 minutes

### Associate Projects, Cognizant Technology Solutions

Jul 2021 – May 2022    Remote

#### Google Trust & Safety Devshop

With a large client base, Google's process executive operators required several extensions to save manual work while examining applicant's personal and transactional data. The Devshop team was in charge of developing extensions and dashboards to automate operations, monitor apps, and simplify the journey and verification process.

Team Size - 15

#### Responsibilities:

- Developed extensions/tools used internally or by certain Google clients directly at the client's organisation (Google)
- Carried out the entire development process in CWS, including requirement gathering, documentation, programming, testing, and deployment
- Created extensions with JS, as well as the back end (Python) and database support (Cloud SQL)
- Deploying back end on App Engine in GCP for production and non-production environments. Testing and promotion to multiple environments following client evaluation
- Coordinated with cross-functional teams to ensure successful execution of client projects
- Conducted code reviews and mentored junior developers to improve code quality and ensure adherence to best practices

## Software Engineer, Alten Calasoft Labs(India Private Limited)

Apr 2021 – Jul 2021    Remote

**AGTB – Anglo Gulf Trade bank**

Scrum team: **24**

Role: **Java Developer**

### Responsibilities:

- Implemented and tested REST APIs to support partner and corporate onboarding. Packaged applications for deployment across environments.
- Built an automated system to monitor and update the core product JAR across downstream repositories, reducing manual version management.
- Implemented OAuth authentication for secure API access and developed automation scripts to remove repetitive tasks.
- Performed code reviews and mentored junior developers to improve delivery quality.

## Senior Systems Engineer, Infosys Limited

Oct 2020 – Apr 2021    Pune

**Third Party Data Gateway (TPDG)**

Client: **American Express –**

Scrum team: **12**

Role: **Engineer III**

- Collaborated with Amex senior engineers to gather requirements, estimate effort and define technical approach.
- Implemented and enhanced TPDG microservice components using Java/Spring, following best practices to reduce code smells.
- Exposed secure REST endpoints and validated end-to-end integrations with domain systems.
- Built a CI/CD pipeline using XLR templates to improve deployment reliability and speed.
- Authored and executed comprehensive test plans to identify vulnerabilities and ensure compliance with industry standards.

## Systems Engineer, Infosys Limited

Nov 2017 – Sept 2020    Bhubaneswar

**The Hartford Ability Advantage-Self Administration**

Scrum team: **6**

Role: **Java Developer**

### Responsibilities:

- Partnered with stakeholders to gather requirements, estimate effort and propose technical approaches.
- Developed and enhanced Service, DAO and presentation layers using Spring MVC, Hibernate and UI technologies.
- Designed and executed test plans that reduced vulnerabilities by 50% and ensured compliance with industry standards.
- Investigated and resolved critical production issues, improving system stability and performance.
- Monitored performance and optimized code paths to increase system throughput.

## Education

### Maharishi Markandeshwar Deemed To Be University, Bachelor Of Technology

Aug 2013 – May 2017    • Ambala, Haryana

Stream: **Computer Science & Engineering**

CGPA: **8.53**

### Kendriya Vidyalaya, Senior Secondary

Apr 2012 – Mar 2013    • Bardhaman, W.B.

Percentage: **73%**

## Awards

### Insta Award

Jun 2020    • Infosys Limited

### Emerging Talent at EXL

Jan 2023    • EXL

### Analytics Oscar Award

Dec 2025    • Northampton
